About me

I'm a Commerce student at Curtin University, studying finance and computer science. I build AI tools and full stack applications, and I enjoy working directly with the people who use them.

I co-founded GoFlo Solutions and now work part-time at Relait as a software engineer and customer success associate. My finance background helps me understand the commercial goals behind the software I build.

Languages & Core

- Python, Java, TypeScript
- Data Structures & Algorithms

Frontend

- React, Astro, Svelte, Tailwind CSS

Backend

- Node.js, Express, REST API design

Data & Infra

- PostgreSQL, Prisma ORM
- Docker, Authentication (JWT)

Tools

- GitHub, VS Code, Azure, AWS
- Claude + LLM tools

Experience

Software Engineer | Customer Success Associate
Relait (Part-time) — **Aug 2026 to Present · 3 mos**

- Build AI agents for the internal team to streamline operations.
- Ship features and bug fixes on Relait's flagship product.
- Work with clients to gather feedback and turn it into product changes.

Co-Founder & Software Developer
GoFlo Solutions — **Aug 2025 to Feb 2026 · 7 mos**

- Built and deployed AI tools for mining, service and coaching businesses.
- Automated reporting and CRM workflows that took 1 to 4 hours manually.
- Built internal knowledge systems for sales and delivery work.

IT Consultancy | Product & Growth
Biz365 — **Jun to Oct 2025 · 5 mos**

- Ran outbound outreach and customer interviews for an early B2B product.

Financial Analyst
Dradgin — **Jun 2023 to Jul 2024 · 1 yr 2 mos**

- Built investment and valuation models for commercial property and presented them to directors and executives.

Projects

Field Frame | Logistics Scheduling Platform

- Full stack logistics dashboard for drivers, freight jobs and proof of delivery.
