

AUSTIN SCOTT DELIC

Software Development Engineer

Perth, Western Australia

austin@austindelic.com ♦ (+61) 402 919 111 ♦ austindelic.com ♦ linkedin.com/in/austindelic ♦ github.com/austindelic

SKILLS, LANGUAGES, INTERESTS

- **Core CS:** Data Structures and Algorithms, Object-Oriented Design, System Design, Distributed Systems, Relational Databases
- **Languages:** Python, Go, Rust, C / C++, TypeScript / JavaScript, SQL, Bash
- **Backend and Systems:** Linux / UNIX, PostgreSQL, Distributed Systems, Asynchronous Processing, REST APIs, Microservices
- **Cloud and Infrastructure:** AWS (EC2, S3, RDS, Lambda), Docker, OpenTofu (IaC), Nginx, Git
- **Soft Skills:** Ownership, Dealing with Ambiguity, Critical Thinking, Collaboration

WORK EXPERIENCE

AITAI - AI Institute

Perth, Western Australia

LaunchLAB AI Cohort One '26

Mar 2026 – Present

- Selected for Cohort One of LaunchLAB AI '26, a competitive AI product accelerator run by the AI Institute of Australia.
- Building AI-native products with ML model integration and real-time inference pipelines, taking full ownership of system architecture and delivery end-to-end.

Script Ventures

Remote

Junior Software Engineer

Mar 2026 – Present

- Engineering and shipping production backend features on a distributed pharmaceutical software system, collaborating across a remote team.
- Contributing to system design decisions, code review, and deployment pipeline improvements alongside senior engineers.

Independent Contracting

Perth, Western Australia

Software Engineer

Jan 2026 – Mar 2026

- Designed and shipped full-stack systems end-to-end, serving hundreds of active users across Australia with full infrastructure ownership on Linux servers.
- Operated the full delivery lifecycle, architecture, implementation, deployment, and post-launch reliability, as a solo engineer on tight deadlines.

Lightbulb Skills

Perth, Western Australia

Junior Software Engineer

Oct 2024 – Dec 2025

- Architected and maintained a production CRM on Next.js, React, and PostgreSQL; owned schema design, asynchronous backend processing, and deployment end-to-end.
- Shipped iterative backend and frontend improvements with a focus on reliability and maintainability in a live production environment serving real customers.

PROJECTS

Distributed Document Processing Pipeline

Personal Project

Jun 2025 – Present

- Built a distributed, multi-tiered document processing system in Go with concurrent worker pools, fault-tolerant task queues, and horizontal scaling across multiple nodes.
- Designed relational schema in PostgreSQL for high-volume document metadata, with optimised indexing and query planning for low-latency reads at scale.
- Provisioned and managed infrastructure on AWS (EC2, S3, RDS) using OpenTofu, enabling reproducible deployments and automated scaling.

Still (Cross-Platform Systems CLI)

Open Source

Dec 2024 – Present

- Engineered a Rust-based systems CLI for deterministic, cross-platform dependency resolution across macOS, Linux, and Windows, applying constraint-satisfaction algorithms for version pinning.
- Designed a custom TOML specification with conditional logic and platform-aware build graphs; implemented a dependency resolver with topological sort for reproducible, ordered execution.
- Built for correctness under ambiguous dependency graphs, with explicit error propagation and no silent failure paths.

Real-Time Collaborative Task System

- Open Source
- Apr 2025 – Present
- Built a full-stack multi-tiered application with a SvelteKit frontend, PostgreSQL relational backend, and server-sent events for real-time state synchronisation across distributed clients.
 - Designed normalised relational schema with referential integrity and concurrent write handling; implemented optimistic concurrency control to prevent data races under simultaneous updates.

Tactify (Accessible Document AI)

- Personal Project
- Sep 2025 – Present
- Engineered a high-throughput document transformation pipeline in Go with asynchronous processing and typed API contracts using Connect-tRPC.
 - Applied optimisation techniques to reduce end-to-end latency, batching AI inference calls and parallelising I/O-bound transformation stages.

EDUCATION

Curtin University <i>Bachelor of Science, Computer Science</i>	Perth, Western Australia Feb 2026 – Oct 2028
Curtin University <i>Mechatronic Engineering Honours and Computer Science Double Degree (BEng Hons/BSc)</i> • GPA 7.5 / 10.0, transferred to Computer Science after first year • Dean’s List, Letter of Commendation	Perth, Western Australia Feb 2025 – Oct 2025
Aquinas College <i>Western Australian Certificate of Education (WACE)</i> • Computer Science ATAR Dux	Perth, Western Australia Feb 2016 – Oct 2024

HONORS AND AWARDS

3rd Place, VisagioX & Venture UWA Hackathon Issued by <i>VisagioX & Venture UWA</i> • Built an on-device AI application detecting harmful conversation patterns in real time with no data leaving the device; owned the system end-to-end from architecture to delivery.	Perth, Western Australia Apr 2026
Sponsored Participant, Hack48 Issued by <i>Hack48</i> • Competitively sponsored to attend Hack48, a 48-hour hackathon uniting top student builders across Australia and internationally. • Engineered a Braille conversion system to transform written content into tactile output for visually impaired users.	Sydney, New South Wales, Australia Dec 2025
Sponsored Participant, Hack Club Residency Issued by <i>Hack Club</i> • Sponsored for an international Hack Club residency in San Francisco; competed in the UC Berkeley AI Hackathon (Jun, Jul 2025).	San Francisco, California, United States Jun 2025
Most Innovative, ComSSA Hackathon Issued by <i>Curtin University / ComSSA</i>	Perth, Western Australia Dec 2024

LEADERSHIP AND ACTIVITIES

Curtin Computer Science Students Association (ComSSA) <i>Sub-Committee Member</i> • Built and maintained tooling and infrastructure for the association’s events and online presence.	Perth, Western Australia, Australia Mar 2025 – Sep 2025
---	---
