

AUSTIN SCOTT DELIC

Software Development Engineer

Perth, Western Australia

austin@austindelic.com ♦ (+61) 402 919 111 ♦ austindelic.com ♦ linkedin.com/in/austindelic ♦ github.com/austindelic

SKILLS, LANGUAGES, INTERESTS

- **Core CS:** Data Structures, Algorithms, System Design, Object-Oriented Programming
- **Languages:** Python, Go, Kotlin, TypeScript / JavaScript, Rust, C / C++, SQL, Bash
- **Backend & Distributed Systems:** AWS (EC2, S3, Lambda), Distributed systems, Asynchronous processing, REST APIs, PostgreSQL, Microservices, OpenTofu (IaC)
- **Infrastructure & Tooling:** Docker, Linux, Git, Nginx
- **Soft Skills:** Ownership, Critical Thinking, Communication, Collaboration

WORK EXPERIENCE

AITAI - AI Institute

Perth, Western Australia

LaunchLAB AI Cohort One '26

Mar 2026 – Present

- Selected for Cohort One of LaunchLAB AI '26, a competitive AI product accelerator run by the AI Institute of Australia.
- Building AI-native products with ML model integration and real-time inference pipelines, taking ownership of system architecture and delivery end-to-end.

Script Ventures

Remote

Junior Software Engineer

Mar 2026 – Present

- Developing backend services on a distributed production system at a pharmaceutical software venture, collaborating with engineers across a distributed team.
- Taking ownership of backend features and contributing to system design decisions, code review, and deployment pipeline improvements alongside senior engineers.

Independent Contracting

Perth, Western Australia

Software Engineer

Jan 2026 – Mar 2026

- Designed and shipped full-stack systems end-to-end, from backend architecture to deployment on AWS, serving hundreds of active users with full infrastructure ownership.
- Operated the full delivery lifecycle building and operating production systems, architecture, implementation, deployment, and post-launch reliability, as a solo engineer.

Lightbulb Skills

Perth, Western Australia

Junior Software Engineer

Oct 2024 – Dec 2025

- Architected and maintained a production CRM on Next.js, React, and PostgreSQL; owned schema design, asynchronous backend processing, and deployment end-to-end.
- Shipped iterative frontend and backend improvements with a focus on reliability and maintainability in a live production environment.

PROJECTS

AI Legal Document Platform

Personal Project

Jun 2025 – Present

- Built a full-stack AI system for automated document classification in legal discovery, designed to support real-world document workflows at scale; owned system architecture end-to-end.
- Developed asynchronous backend workers in Go for high-volume document classification pipelines with concurrent processing and fault-tolerant design.
- Provisioned and managed cloud infrastructure on AWS using Infrastructure-as-Code (OpenTofu), defining compute, storage, and data processing pipelines for reproducible deployments.

Tactify (AI Document Processing System)

Personal Project

Sep 2025 – Present

- Engineered a full-stack system for converting documents into audio and sensory outputs, with a Go backend handling AI processing pipelines optimised for performance, throughput, and low-latency processing.
- Designed and implemented typed APIs using Connect-tRPC, enforcing contracts between frontend and backend services.
- Built data ingestion and transformation pipelines for unstructured document workloads with scalable architecture for real-time output generation.

Still

- Open Source

Dec 2024 – Present
- Engineered a Rust-based systems CLI for deterministic, cross-platform dependency resolution and environment reproducibility across macOS, Linux, and Windows.
 - Designed a custom TOML specification with conditional logic and platform-aware build graphs; implemented a dependency resolver producing deterministic, reproducible output at scale.

crib.

- Open Source

Apr 2025 – Present
- Built a full-stack collaborative task manager using Svelte 5 (runes), SvelteKit, and PostgreSQL; designed data schema, API layer, and deployment end-to-end.
 - Engineered real-time synchronisation across clients using server-sent events with fine-grained reactivity for a low-latency user experience.

EDUCATION

Curtin University <i>Computer Science Degree Major</i>	Perth, Western Australia Feb 2026 – Oct 2028
Curtin University <i>Mechatronic Engineering Honours and Computer Science Double Degree (BEng Hons/BSc)</i> - GPA 7.5 / 10.0, transferred to Computer Science after first year - Dean’s List, Letter of Commendation	Perth, Western Australia Feb 2025 – Oct 2025
Aquinas College <i>Western Australian Certificate of Education (WACE)</i> Computer Science ATAR Dux	Perth, Western Australia Feb 2016 – Oct 2024

HONORS AND AWARDS

3rd Place, VisagioX & Venture UWA Hackathon Issued by <i>VisagioX & Venture UWA</i> Built an on-device AI application detecting harmful conversation patterns in real time with no data leaving the device; owned the system end-to-end from architecture to delivery.	Perth, Western Australia Apr 2026
Sponsored Participant, Hack48 Issued by <i>Hack48</i> - Competitively sponsored to attend Hack48, a 48-hour hackathon uniting top student builders across Australia and internationally. - Engineered a Braille conversion system to transform written content into tactile output for visually impaired users.	Sydney, New South Wales, Australia Dec 2025
Sponsored Participant, Hack Club Residency Issued by <i>Hack Club</i> Sponsored for an international Hack Club residency in San Francisco; competed in the UC Berkeley AI Hackathon (Jun, Jul 2025).	San Francisco, California, United States Jun 2025
Most Innovative, ComSSA Hackathon Issued by <i>Curtin University / ComSSA</i>	Perth, Western Australia Dec 2024

LEADERSHIP AND ACTIVITIES

Curtin Computer Science Students Association (ComSSA) <i>Sub-Committee Member</i> Built and maintained tooling and infrastructure for the association’s events and online presence.	Perth, Western Australia, Australia Mar 2025 – Sep 2025
---	---
