

AUSTIN SCOTT DELIC

Systems Development Engineer

Perth, Western Australia

austin@austindelic.com ♦ (+61) 402 919 111 ♦ austindelic.com ♦ linkedin.com/in/austindelic ♦ github.com/austindelic

SKILLS, LANGUAGES, INTERESTS

- **Systems & Infrastructure:** AWS (EC2, S3, Lambda), Docker, Linux, Nginx, Cloudflare, OpenTofu (IaC), Bash, Git
- **Programming:** Go, Python, Rust, C / C++, TypeScript / JavaScript, SQL
- **Systems Engineering:** Distributed systems, CI/CD pipelines, Automation, Networking, REST APIs, PostgreSQL, Monitoring and debugging

WORK EXPERIENCE

AITAI - AI Institute

Perth, Western Australia

LaunchLAB AI Cohort One '26

Mar 2026 – Present

- Selected for Cohort One of LaunchLAB AI '26, a competitive AI product accelerator run by the AI Institute of Australia.
- Building AI-native products with real-time inference pipelines, taking ownership of system architecture, reliability, and delivery end-to-end.

Script Ventures

Remote

Junior Software Engineer

Mar 2026 – Present

- Built and deployed backend services in a distributed system at a pharmaceutical software venture, contributing to system reliability, deployment workflows, and service scalability.
- Improved CI/CD pipelines and deployment workflows, debugging build failures and increasing deployment reliability in Linux environments.

Independent Contracting

Perth, Western Australia

Software Engineer

Jan 2026 – Mar 2026

- Designed, deployed, and operated full-stack systems on AWS, managing infrastructure, containerisation, and production reliability for hundreds of active users.
- Automated infrastructure provisioning and deployments using Docker and Infrastructure-as-Code, reducing operational overhead through automation and scalable infrastructure design.

Lightbulb Skills

Perth, Western Australia

Junior Software Engineer

Oct 2024 – Dec 2025

- Implemented and maintained a production CRM system, improving backend reliability, database performance, and deployment workflows in a live production environment.
- Debugged and resolved production issues using logs and system-level analysis, ensuring system stability and uptime.

PROJECTS

AI Legal Document Platform

Personal Project

Jun 2025 – Present

- Provisioned and operated a full-stack AI system for automated document classification in legal discovery; owned system architecture, AWS infrastructure, and deployment end-to-end.
- Built concurrent backend workers in Go for high-volume document processing, enabling fault-tolerant and scalable pipelines handling hundreds of tasks concurrently.
- Monitored and debugged processing pipelines to ensure reliability under load; improved system observability through structured logging.
- Provisioned and managed cloud infrastructure on AWS using Infrastructure-as-Code (OpenTofu), defining compute, storage, and processing pipelines for reproducible deployments.

Homelab Infrastructure (Self-Hosted Platform)

Personal Project

Jan 2025 – Present

- Engineered and operated a self-hosted infrastructure platform using Docker, reverse proxies, and Linux-based systems running on local hardware.
- Configured networking, TLS, and secure service exposure using Cloudflare Tunnel, eliminating public attack surface across multiple containerised services.
- Automated service deployment and management across multiple containerised services, reducing manual operational overhead.

Still

- Open Source

Dec 2024 – Present
- Engineered a Rust-based infrastructure CLI for deterministic, cross-platform dependency resolution and environment provisioning across macOS, Linux, and Windows.
 - Designed a custom TOML specification with conditional logic and platform-aware build graphs; implemented a dependency resolver producing deterministic, reproducible output at scale.

Tactify (AI Document Processing System)

- Personal Project

Sep 2025 – Present
- Engineered a Go backend system handling AI processing pipelines with concurrent processing for performance, throughput, and low-latency output generation.
 - Built data ingestion and transformation pipelines for unstructured document workloads with scalable, fault-tolerant architecture.

EDUCATION

Curtin University <i>Computer Science Degree Major</i>	Perth, Western Australia Feb 2026 – Oct 2028
Curtin University <i>Mechatronic Engineering Honours and Computer Science Double Degree (BEng Hons/BSc)</i>	Perth, Western Australia Feb 2025 – Oct 2025
- GPA 7.5 / 10.0, transferred to Computer Science after first year - Dean’s List, Letter of Commendation	
Aquinas College <i>Western Australian Certificate of Education (WACE)</i>	Perth, Western Australia Feb 2016 – Oct 2024
Computer Science ATAR Dux	

HONORS AND AWARDS

3rd Place, VisagioX & Venture UWA Hackathon Issued by <i>VisagioX & Venture UWA</i>	Perth, Western Australia Apr 2026
Built an on-device AI system detecting harmful conversation patterns in real time with no data leaving the device; owned architecture, implementation, and delivery end-to-end.	
Sponsored Participant, Hack48 Issued by <i>Hack48</i>	Sydney, New South Wales, Australia Dec 2025
- Competitively sponsored to attend Hack48, a 48-hour hackathon uniting top student builders across Australia and internationally. - Engineered a Braille conversion system to transform written content into tactile output for visually impaired users.	
Sponsored Participant, Hack Club Residency Issued by <i>Hack Club</i>	San Francisco, California, United States Jun 2025
Sponsored for an international Hack Club residency in San Francisco; competed in the UC Berkeley AI Hackathon (Jun, Jul 2025).	
Most Innovative, ComSSA Hackathon Issued by <i>Curtin University / ComSSA</i>	Perth, Western Australia Dec 2024

LEADERSHIP AND ACTIVITIES

Curtin Computer Science Students Association (ComSSA) <i>Sub-Committee Member</i>	Perth, Western Australia, Australia Mar 2025 – Sep 2025
Built and maintained tooling and infrastructure for the association’s events and online presence.
