

AUSTIN SCOTT DELIC

Software Engineer (Infrastructure & Systems)

Perth, Western Australia

austin@austindelic.com ♦ (+61) 402 919 111 ♦ austindelic.com ♦ linkedin.com/in/austindelic ♦ github.com/austindelic

SKILLS, LANGUAGES, INTERESTS

- **Infrastructure & Cloud:** AWS, OpenTofu (IaC), Docker, Linux, Nginx, Cloudflare, Git
- **Languages:** Python, Go, TypeScript / JavaScript, Rust, C / C++, SQL, Bash
- **Backend Systems:** PostgreSQL, REST APIs, Distributed processing, distributed systems, cloud architecture fundamentals, and service isolation
- **Soft Skills:** Leadership, Critical Thinking, Communication

WORK EXPERIENCE

AITAI - AI Institute

Perth, Western Australia

LaunchLAB AI Cohort One '26

Mar 2026 – Present

- Selected for Cohort One of LaunchLAB AI '26, a competitive AI product accelerator run by the AI Institute of Australia.
- Building AI-native products with ML model integration and real-time inference; actively applying AI tooling to accelerate development workflows.

Script Ventures

Remote

Junior Software Engineer

Mar 2026 – Present

- Shipping production features across a distributed system at a pharmaceutical software venture, collaborating with engineers in a distributed team environment on backend services, deployment workflows, and system design.
- Contributing to code review and deployment pipeline decisions alongside senior engineers in a fast-paced remote environment.

Independent Contracting

Perth, Western Australia

Software Engineer

Jan 2026 – Mar 2026

- Designed and shipped full-stack systems end-to-end, from UI through backend to deployment, serving hundreds of active users with full ownership over containerisation and production reliability.
- Operated the full delivery lifecycle building and operating production systems, architecture, implementation, deployment, and post-launch reliability, across both local and cloud environments.

Lightbulb Skills

Perth, Western Australia

Junior Software Engineer

Oct 2024 – Dec 2025

- Implemented and maintained a production CRM on Next.js, React, and PostgreSQL; owned schema design, deployment pipeline, and production reliability.
- Shipped iterative backend and frontend improvements in a live environment, managing schema migrations and releases independently.

PROJECTS

AI Legal Document Platform

Personal Project

Jun 2025 – Present

- Provisioned and operated a full-stack AI system for automated document classification in legal discovery, designed to support real-world document workflows for end users; architected service-oriented separation across frontend, API layer, and backend processing services.
- Developed asynchronous backend workers for high-volume document classification pipelines with concurrent processing.
- Provisioned and managed cloud infrastructure on AWS using Infrastructure-as-Code (OpenTofu), defining compute, storage, and data processing pipelines for consistent, reproducible deployments.

Homelab Infrastructure (Self-Hosted Platform)

Personal Project

Jan 2025 – Present

- Engineered a self-hosted infrastructure stack using Docker-based service orchestration and reverse proxy architecture on local hardware; built and operated systems across both local and cloud environments.
- Exposed services securely via Cloudflare Tunnel, eliminating public attack surface; managed TLS, networking, and service isolation across multiple containerised services.

Still

Open Source

Dec 2024 – Present

- Engineered a Rust-based infrastructure CLI for deterministic, cross-platform dependency resolution and environment provisioning across macOS, Linux, and Windows.
- Designed a custom TOML spec with conditional logic and platform-aware build graphs; implemented a dependency resolver producing reproducible output.

Tactify (AI Document Processing System)

Personal Project

Sep 2025 – Present

- Engineered a full-stack system for converting documents into audio and sensory outputs, with a Go backend handling AI processing pipelines leveraging concurrent processing for performance, throughput, and low-latency processing.
- Designed and implemented typed APIs using Connect-trPC to interface between frontend and backend services.
- Built data pipelines for document ingestion, processing, and output transformation with scalable architecture for real-time generation.

crib.

Open Source

Apr 2025 – Present

- Implemented a full-stack task manager with real-time synchronisation via server-sent events, backed by SvelteKit and PostgreSQL; owned schema, API, and deployment end-to-end.

EDUCATION

Curtin University <i>Computer Science Degree Major</i>	Perth, Western Australia Feb 2026 – Oct 2029
Curtin University <i>Mechatronic Engineering Honours and Computer Science Double Degree (BEng Hons/BSc)</i> • GPA 7.5 / 10.0, transferred to Computer Science after first year • Dean’s List, Letter of Commendation	Perth, Western Australia Feb 2025 – Oct 2025
Aquinas College <i>Western Australian Certificate of Education (WACE)</i> • Computer Science ATAR Dux	Perth, Western Australia Feb 2016 – Oct 2024

HONORS AND AWARDS

3rd Place, VisagioX & Venture UWA Hackathon Issued by <i>VisagioX & Venture UWA</i> • Built an on-device AI application detecting harmful conversation patterns in real time; leveraged AI tooling throughout development to accelerate the build.	Perth, Western Australia Apr 2026
Sponsored Participant, Hack48 Issued by <i>Hack48</i> • Competitively sponsored to attend Hack48, a 48-hour hackathon; engineered a Braille conversion system targeting accessibility for visually impaired users.	Sydney, New South Wales, Australia Dec 2025
Sponsored Participant, Hack Club Residency Issued by <i>Hack Club</i> • Sponsored for an international Hack Club residency in San Francisco; competed in the UC Berkeley AI Hackathon (Jun–Jul 2025).	San Francisco, California, United States Jun 2025
Technical Resources Scholarship Issued by <i>Technical Resources Pty Ltd</i>	Perth, Western Australia Dec 2024
Charlie Bell Scholarship Issued by <i>Ronald McDonald House Charities WA</i>	Perth, Western Australia Dec 2024
Most Innovative, ComSSA Hackathon Issued by <i>Curtin University / ComSSA</i>	Perth, Western Australia Dec 2024
Computer Science ATAR Dux Issued by <i>Aquinas College WA</i>	Perth, Western Australia Oct 2024

LEADERSHIP AND ACTIVITIES

Curtin Computer Science Students Association (ComSSA) <i>Sub-Committee Member</i> • Contributed to the Tech Team, building and maintaining tooling and infrastructure for the association’s events and online presence.	Perth, Western Australia, Australia Mar 2025 – Sep 2025
